QUALITY ASSURANCE RESULTS FOR THE ANALYSIS OF WATER SAMPLES FOR TOTAL METALS USING EPA METHOD 200.8

Laboratory Code: 003301-01 (Duplicate)

				Relative			
		Sample	Duplicate	Percent	Acceptance		
_Analyte	Reporting Units	Result	Result	Difference	Criteria		
Chromium	ug/L (ppb)	<1	<1	nm	0-20		
Nickel	ug/L (ppb)	<1	<1	nm	0-20		
Copper	ug/L (ppb)	2.73	2.79	2	0-20		
Zinc	ug/L (ppb)	5.46	4.64	16	0-20		

Laboratory Code: 003301-01 (Matrix Spike)

				Percent	
		Spike	Sample	Recovery	Acceptance
Analyte	Reporting Units	Level	Result	MS	Criteria
Chromium	ug/L (ppb)	20	<1	98	67-132
Nickel	ug/L (ppb)	20	<1	100	73-119
Copper	ug/L (ppb)	20	2.73	100	50-144
Zinc	ug/L (ppb)	50	5.46	91	46-148

Laboratory Code: Laboratory Control Sample

			Percent	
		Spike	Recovery	Acceptance
Analyte	Reporting Units	Level	LCS	Criteria
Chromium	ug/L (ppb)	20	96	66-135
Nickel	ug/L (ppb)	20	102	67-134
Copper	ug/L (ppb)	20	102	66-134
Zinc	ug/L (ppb)	50	91	57-135

ENVIRONMENTAL CHEMISTS

Data Qualifiers & Definitions

- ${\bf a}$ The analyte was detected at a level less than five times the reporting limit. The RPD results may not provide reliable information on the variability of the analysis.
- A1 More than one compound of similar molecule structure was identified with equal probability.
- b The analyte was spiked at a level that was less than five times that present in the sample. Matrix spike recoveries may not be meaningful.
- ca The calibration results for this range fell outside of acceptance criteria. The value reported is an estimate.
- \ensuremath{c} The presence of the analyte indicated may be due to carryover from previous sample injections.
- d The sample was diluted. Detection limits may be raised due to dilution.
- ds The sample was diluted. Detection limits are raised due to dilution and surrogate recoveries may not be meaningful.
- $\mbox{d} v$ Insufficient sample was available to achieve normal reporting limits and limits are raised accordingly.
- fb Analyte present in the blank and the sample.
- fc The compound is a common laboratory and field contaminant.
- hr The sample and duplicate were reextracted and reanalyzed. RPD results were still outside of control limits. The variability is attributed to sample inhomogeneity.
- ht Analysis performed outside the method or client-specified holding time requirement.
- ip Recovery fell outside of normal control limits. Compounds in the sample matrix interfered with the quantitation of the analyte.
- j The result is below normal reporting limits. The value reported is an estimate.
- J The internal standard associated with the analyte is out of control limits. The reported concentration is an estimate.
- ${\it jl}$ The analyte result in the laboratory control sample is out of control limits. The reported concentration should be considered an estimate.
- jr The rpd result in laboratory control sample associated with the analyte is out of control limits. The reported concentration should be considered an estimate.
- js The surrogate associated with the analyte is out of control limits. The reported concentration should be considered an estimate.
- lc The presence of the compound indicated is likely due to laboratory contamination.
- L The reported concentration was generated from a library search.
- $\,$ nm The analyte was not detected in one or more of the duplicate analyses. Therefore, calculation of the RPD is not applicable.
- pc The sample was received in a container not approved by the method. The value reported should be considered an estimate.
- pr The sample was received with incorrect preservation. The value reported should be considered an estimate.
- ve Estimated concentration calculated for an analyte response above the valid instrument calibration range. A dilution is required to obtain an accurate quantification of the analyte.
- vo The value reported fell outside the control limits established for this analyte.
- $x\hbox{ The sample chromatographic pattern does not resemble the fuel standard used for quantitation.}\\$

April 7, 2010

Gerry Thompson, Project Manager Alaskan Copper Works 628 South Hanford Seattle, WA 98134

Dear Mr. Thompson:

Included are the results from the testing of material submitted on March 31, 2010 from the Metro Self Monitor, PO M 124873, F&BI 003317 project. There are 4 pages included in this report. Any samples that may remain are currently scheduled for disposal in 30 days. If you would like us to return your samples or arrange for long term storage at our offices, please contact us as soon as possible.

We appreciate this opportunity to be of service to you and hope you will call if you have any questions.

Sincerely,

FRIEDMAN & BRUYA, INC.

Kortland Orr Project Manager
